

As one of the leading payment solutions providers in the Philippines, Metrobank Card Corporation (MCC) is proud to offer **M Swipe** – the country’s first mobile payment platform that enables, not just merchants, but anyone to accept card payments wherever they are on the country.

### A payment platform for all markets

**M Swipe** is a secure, low-cost and industry-compliant payment platform that provides a secure, cashless environment for merchants and customers. It cuts across the different market segments – from small and traditional retail, to industrial, to corporate wholesale.

Compared to the usual point-of-sale (POS) terminals (also known as “swipers”) found in malls and commercial establishments, the **M Swipe** reader is compact and lightweight, thus providing mobility and convenience.

**M Swipe** allows anyone to accept card payments anytime, anywhere. All you need is a smartphone, an **M Swipe** reader and a Metrobank account.

### Complies with global payment standards

**M Swipe** complies with both the Payment Application Data Security Standard (PA-DSS) and the Payment Card Industry Data Security Standard (PCI-DSS) for mobile payment applications. Cardholder data is authenticated, encrypted and protected at each step of the transaction process – from card reader, to mobile phone, to server. **M Swipe** ensures that a customer’s credit card information is never stored in the smartphone used and is protected from various data theft schemes such as skimming.

### How to Use M Swipe

Accepting card payment is simple:

1. Attach the **M Swipe** reader to your smartphone.
2. Launch the **M Swipe** app on your smartphone and enter the amount and description of the transaction. Swipe the card on the **M Swipe** reader.
3. Tap on the signature panel and ask the customer to sign directly on the screen. Tap **DONE**.
4. Enter the customer’s email address to which the transaction slip will be sent, then tap **NEXT** to process the transaction.
5. Once transaction is approved, a confirmation page will appear. Tap **OK** to end. Payment for this transaction will be credited to your Metrobank account.

### Applying for M Swipe

Anyone can apply for **M Swipe** in three easy steps:

1. Visit Metrobank Card’s website ([www.metrobankcard.com](http://www.metrobankcard.com)) to download the M Swipe application form and know the requirements that apply to you or your type of business.
2. Once completed, submit the M Swipe application form and the complete requirements at any Metrobank branch.
3. Open a Metrobank deposit account to receive payments.

Once application is approved, you will receive the **M Swipe** reader, an authentication code and PIN. Just download the **M Swipe** app on your smartphone and you’re ready to start accepting card payments.

Your customers will receive their digitally-signed transaction slips via email and payments will be credited to your Metrobank deposit account.

Empower cashless payments with **M Swipe**.
